WORK EXPERIENCE

Back End Developer | OnCall Company

(Mar 2024 - Present)

- Leveraging Laravel , I'm building and maintaining web applications to streamline internal processes and enhance the user experience, contributing to increased efficiency and productivity

Full-Stack Web Developer | Elevate Company

(Jul 2022 – Apr 2024)

- Leveraged Laravel and React.js to design and develop scalable web applications that dramatically improved user engagement for Elevate, a subsidiary of Outsource, a leading provider of solar panel maintenance, installation, and financing solutions.

Back-End Developer | Dokans Company (Laravel)

(Dec 2022 - Jul 2023)

- Streamlined multi-vendor e-commerce operations by building robust integrations with various external platforms using Laravel. This enhanced data flow and improved overall efficiency within Dokans' e-commerce ecosystem, Such as payment gateways, shipping platforms, platforms for creating referral campaigns via email, platforms for displaying advertisements to the user, etc.

Backend Developer | POS Company (Laravel)

(Nov 2022 - Mar 2023)

Upgraded POS platform, using Laravel to improve functionality and user experience. Key achievements include:

- Streamlined operations and customer service: Integrated core shipping services allowing for real-time shipping quotes and tracking information, which can lead to increased customer satisfaction.
- Improved inventory management: Integrate the platform with the company's inventory system, ensuring accurate inventory levels
- Improved SEO performance: SEO best practices implemented, which can lead to a 15% increase in website traffic.
